STATEWIDE TRANSPORTATION AND LOCAL BRIDGE BOND ACT OF 1999

STATUS REPORT INTRODUCTION

As directed by Section 26 of the Statewide Transportation and Local Bridge Bond Act of 1999, P.L. 1999, c.181, (the “Act”) the Department of Transportation makes the following report on the status of funds provided by the Act and the status of projects financed with those funds.

The Act authorized the issuance of $500 million in bonds and created the 1999 Statewide Transportation and Local Bridge Fund to finance the rehabilitation and improvement of the State transportation system. Through three separate bond appropriations (P.L. 2000, c.11; P.L. 2000, c.155 and P.L. 2001, c.239), $250 million was made available as grants to county and municipal governments for the rehabilitation and improvement of structurally deficient bridges carrying county and municipal roads and $250 million was made available to the Department and New Jersey Transit Corporation for statewide transportation projects. Of the $250 million appropriated for statewide transportation projects, $246,929,718 (98.8%) has been expended as of April 30, 2012.

Of the $250 million appropriated for local bridge projects, $231,715,368 (92.7%) has been expended as of April 30, 2012. This represents a 7.7% increase in expended funds between the period of April 30, 2011 and April 30, 2012. For this purpose, “expended” means that funds have been paid or are under contract to the county vendor. The remaining $18,284,632 has been distributed to the counties for approved programs, but has not yet been expended. Through an established reporting process, the Department encourages county and municipal governments to spend the funds appropriated to them.

The table on the following page summarizes expenditures for the Department, NJ TRANSIT and each county. A detailed report on project status, both active and completed, using Department information and information provided by NJ Transit and the counties is on the pages that follow.

Project Description
This project would have provided for drainage improvements along Route 130 and Westfield Avenue. Flooding occurs approximately three to five times a year along Pochack Creek, often resulting in the closure of Route 130. A culvert would have been constructed to allow excess stormwater to bypass an industrial park, Route 130, and an adjoining cemetery. The existing creek flows through the Crescent Burial Park and causes extensive flooding; a basin within the cemetery would have reduced flooding in the cemetery. No disturbance of graves was anticipated.

Franklin Viaduct (E-07)

Project Description: This structure is over the NYS&W RR and Wallkill River. CR 631 is a critical artery that connects Routes 23 and 94 in the north-central region of Sussex County. The bridge was built from spare parts in 1927, rebuilt in 1974, struck by a train in 1987 and then repaired. It has been recommended for replacement in the last several NBIS inspections. Due to the many undocumented repairs and reconstruction projects, there is a great potential for hidden flaws. In 1997, the NBIS brought forth a flag for such a potential hidden deficiency. Subsequent to the NBIS inspection, an in-depth inspection was performed that found a crack in one of the girder plates. This resulted in an emergency repair to the structure. The bridge has a sufficiency rating of 2.4. The county proposes to replace the structure in the same vicinity but probably not on the same alignment.

Route: CR 631
