As a result of weather delays during construction which may occur, which would lead to delivery dates not being met.

As a result of utilities not moved in adequate time for mobilization time required prior to bridge demolition. An adequate material storage location near the project is needed. There are a number of empty locations and parking areas that can be used so a replacement can readily be found. A new crane to be used so a replacement can readily be found.

As a result of what can be considered a weather delay which may occur, which would lead to delivery dates not being met.

As a result of components being damaged or delayed during delivery which may occur, which would lead to schedule delays.

As a result of work types for Heavy/Utility construction being chosen to weed out inexperienced contractors. This was done using work types for Heavy/Utility construction being chosen to weed out inexperienced contractors. Carefully chosen to weed out inexperienced contractors.

As a result of what can be considered a weather delay which may occur, which would lead to schedule delays.

As a result of materials not on the qualified product list which may occur, which would lead to improper construction and delays.

As a result of the bid date being delayed resulting in a backlog in orders which may occur, which would lead to improper construction and schedule delays.

As a result of various owners to obtain clearance for material movement. There are a number of empty locations and parking areas that can be used so a replacement can readily be found.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of Components being damaged or delayed during delivery which may occur, which would lead to schedule delays.

As a result of what can be considered a weather delay which may occur, which would lead to schedule delays.

As a result of weather delays during construction which may occur, which would lead to delay in delivery dates not being met.

As a result of Construction delays due to inadequate material storage location near the project site which may occur, which would lead to schedule delays.

As a result of Components being damaged or delayed during delivery which may occur, which would lead to schedule delays.

As a result of the use of the qualified product list that meet the necessary requirements.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

4. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

5. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

6. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

7. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

8. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

9. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

10. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

11. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

12. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

13. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

14. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

15. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

16. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.

17. As a result of the use of materials not meeting required 20 hour strength requirements which may occur, which would lead to schedule delays.
