ANNOUNCEMENT:  BDC17MR-05

DATE:  November 29, 2017

SUBJECT:  Curb Face Reduction at GR Terminal & Miscellaneous Changes

REFERENCE:  Curb Face Reduction at GR Terminal

The “Section 8-Guide Rail and Median Barriers” of the 2015 Roadway Design Manual has been revised.

NJDOT certifies that all changes are in conformance to the following:
- Current guidance and research (simulation, crash testing, consultations, etc.) for the MASH 31” High Midwest Guide Rail System (MGS).
- MASH implementation for guide rail and concrete barrier curb

Roadway Design Manual Section 8 Changes:

DESCRIPTION OF THE CHANGES:

1. Changed “4 feet from back of the rail element” to “4 feet from face of the rail element” in Section 8.2.4B.1. Trees.
2. Changed height of curb and curb treatment at flared and tangent guide rail terminals and beam guide rail anchorages in the Roadway Design Manual Section 8.3.1 B.1, 8.3.2 A.2, 8.3.2 B.5, 8.3.2 C.5, and Figures 8-X and 8-Y.
3. Changed “beam guide rail end anchorage” to “beam guide rail anchorage” throughout Section 8.
4. Changed “truck volume” to “traffic volume” in Section 8.4.2: 2nd paragraph No. 4 and 4th paragraph No. 3.
REASON FOR THE CHANGES:

1. MASH guide rail deflections are measured from face of rail element, not back of rail element.
2. After consultation with Midwest Roadside Safety Facility on treatment of flared and tangent guide rail terminals and beam guide rail anchorages with curb, the above changes are being made based on the current knowledge we have to date on MASH terminals with curb. We are changing our standard from using 4 inch curb at GR terminals to 2 inch curb at GR terminals.
3. Changed term to match pay item name.
4. Correction.

This revision must be read in conjunction with the referenced BDC Announcement.

Implementation Code S (SPECIAL)

These BDC changes must be implemented in all Department projects that have a project letting date after December 31, 2017. The letting date is the receipt and opening of bids - “Activity 5040 Receive bids”. This will allow designers to make necessary plan, specifications, and estimate/proposal changes without requiring the need for an addenda or postponement of advertisement or receipt of bids.
