1. All equipment is installed in a NEMA 3R cabinet.
2. Use 3/8"-24 NC X 1 1/2" LG. STN. STL. FL. HD. SCREWS to secure the cabinet.
3. Use 1/4"-20 NC X 1/2" LG. STN. STL. FL. HD. SCREWS to secure the equipment.
4. Apply black paint to the cabinet.
5. Use neoprene gasket to seal the door.
6. Use Stn. STL. Fl. HD. screws to secure the lozenges.
7. Use Stn. STL fl. HD. screws to secure the louvers.
8. Use Stn. STL. Fl. HD. screws to secure the patch panel.
9. Use Stn. STL. Fl. HD. screws to secure the main breaker.
10. Use Stn. STL. Fl. HD. screws to secure the power distribution.
11. Ensure all equipment is UL & NEMA listed for outdoor installation.
12. Use metric hardware for all screws.
13. Use stainless steel conduits for all connections.
14. Use stainless steel conduit fittings for all connections.
15. Use stainless steel conduit fittings for all connections.
16. Use stainless steel conduit fittings for all connections.
17. Use stainless steel conduit fittings for all connections.
18. Use stainless steel conduit fittings for all connections.
19. Use stainless steel conduit fittings for all connections.
20. Use stainless steel conduit fittings for all connections.
21. Use stainless steel conduit fittings for all connections.
22. Use stainless steel conduit fittings for all connections.
23. Use stainless steel conduit fittings for all connections.
24. Use stainless steel conduit fittings for all connections.
25. Use stainless steel conduit fittings for all connections.
26. Use stainless steel conduit fittings for all connections.
27. Use stainless steel conduit fittings for all connections.
28. Use stainless steel conduit fittings for all connections.
29. Use stainless steel conduit fittings for all connections.
30. Use stainless steel conduit fittings for all connections.
31. Use stainless steel conduit fittings for all connections.
32. Use stainless steel conduit fittings for all connections.
33. Use stainless steel conduit fittings for all connections.
34. Use stainless steel conduit fittings for all connections.
35. Use stainless steel conduit fittings for all connections.
36. Use stainless steel conduit fittings for all connections.
37. Use stainless steel conduit fittings for all connections.
38. Use stainless steel conduit fittings for all connections.
39. Use stainless steel conduit fittings for all connections.
40. Use stainless steel conduit fittings for all connections.
41. Use stainless steel conduit fittings for all connections.
42. Use stainless steel conduit fittings for all connections.
43. Use stainless steel conduit fittings for all connections.
44. Use stainless steel conduit fittings for all connections.
45. Use stainless steel conduit fittings for all connections.
46. Use stainless steel conduit fittings for all connections.
47. Use stainless steel conduit fittings for all connections.
48. Use stainless steel conduit fittings for all connections.
49. Use stainless steel conduit fittings for all connections.
50. Use stainless steel conduit fittings for all connections.
51. Use stainless steel conduit fittings for all connections.
52. Use stainless steel conduit fittings for all connections.
53. Use stainless steel conduit fittings for all connections.
54. Use stainless steel conduit fittings for all connections.
55. Use stainless steel conduit fittings for all connections.
56. Use stainless steel conduit fittings for all connections.
57. Use stainless steel conduit fittings for all connections.
58. Use stainless steel conduit fittings for all connections.
59. Use stainless steel conduit fittings for all connections.
60. Use stainless steel conduit fittings for all connections.
61. Use stainless steel conduit fittings for all connections.
62. Use stainless steel conduit fittings for all connections.
63. Use stainless steel conduit fittings for all connections.
64. Use stainless steel conduit fittings for all connections.
65. Use stainless steel conduit fittings for all connections.
66. Use stainless steel conduit fittings for all connections.
67. Use stainless steel conduit fittings for all connections.
68. Use stainless steel conduit fittings for all connections.
69. Use stainless steel conduit fittings for all connections.
70. Use stainless steel conduit fittings for all connections.
71. Use stainless steel conduit fittings for all connections.
72. Use stainless steel conduit fittings for all connections.
73. Use stainless steel conduit fittings for all connections.
74. Use stainless steel conduit fittings for all connections.
75. Use stainless steel conduit fittings for all connections.
76. Use stainless steel conduit fittings for all connections.
77. Use stainless steel conduit fittings for all connections.
78. Use stainless steel conduit fittings for all connections.
79. Use stainless steel conduit fittings for all connections.
80. Use stainless steel conduit fittings for all connections.
81. Use stainless steel conduit fittings for all connections.
82. Use stainless steel conduit fittings for all connections.
83. Use stainless steel conduit fittings for all connections.
84. Use stainless steel conduit fittings for all connections.
85. Use stainless steel conduit fittings for all connections.
86. Use stainless steel conduit fittings for all connections.
87. Use stainless steel conduit fittings for all connections.
88. Use stainless steel conduit fittings for all connections.
89. Use stainless steel conduit fittings for all connections.
90. Use stainless steel conduit fittings for all connections.
91. Use stainless steel conduit fittings for all connections.
92. Use stainless steel conduit fittings for all connections.
93. Use stainless steel conduit fittings for all connections.
94. Use stainless steel conduit fittings for all connections.
95. Use stainless steel conduit fittings for all connections.
96. Use stainless steel conduit fittings for all connections.
97. Use stainless steel conduit fittings for all connections.
98. Use stainless steel conduit fittings for all connections.
99. Use stainless steel conduit fittings for all connections.
100. Use stainless steel conduit fittings for all connections.
