Newark-Jersey City Turnpike/CR 508 ramp to I-280 westbound deck repair completes in Kearny All lanes will be reopened in final configuration by Tuesday morning

(Trenton) – New Jersey Department of Transportation (NJDOT) officials today announced intermittent traffic stops will be required tonight on the Newark-Jersey City Turnpike/CR 508 ramp to I-280 westbound as the bridge deck repair and pavement overlay project completes in Kearny, Hudson County.

Beginning at 8 p.m. tonight, Monday, November 16 until 6 a.m., the next day, NJDOT's contractor, Joseph M. Sanzari is scheduled to intermittently stop traffic on the Newark-Jersey City Turnpike/CR 508 ramp to I-280 westbound to remove construction barriers and reopen the left lane of traffic. By Tuesday morning, both lanes will be reopened with traffic in its final configuration on the newly repaired deck and pavement.

The \$2.7 million state-funded Ultra High Performance Concrete (UHPC) project is part of a pilot program that is testing the effectiveness of using UHPC as a bridge deck overlay to increase deck service life, enhance structural capacity, and reduce future maintenance. While UHPC is currently being used for joint repairs and other maintenance, this is the first time UHPC is being used as a bridge deck overlay in New Jersey. This contract will perform deck and joint repairs in addition to the application and performance evaluation of the UHPC as a thin-bonded overlay on existing bridge decks.

The pilot program is being carried out in two contracts. This first contract is resurfacing the [I-295/Route 130 northbound bridge deck over Mantua Creek](#) in West Deptford, Gloucester County. This contract will resurface bridge decks on the following three structures:

- [Newark-Jersey City Turnpike/CR 508 ramp to I-280 westbound in Kearny, Hudson County](#)
- [Route 57 Over Hances Brook in Mansfield, Warren County](#)
- [Route 159 over Passaic River in Montville, Morris County](#)

Variable Message Signs are being used to provide advance notification to motorists of all traffic pattern changes associated with the work. The precise timing of the work is subject to change due to weather or other factors.

Motorists are encouraged to check NJDOT's traffic information website www.511nj.org for construction updates and real-time travel information and for NJDOT news follow us on Twitter [@NJDOT_info](#) or on the [NJDOT Facebook page](#).
