SECTION I – BOARD SUMMARY

The purpose of this report is to provide accounting and financial disclosure information under Government Accounting Standards Board Statement 67 for the Police and Firemen's Retirement System of New Jersey. This information includes:

- Projection of the Total Pension Liability from the valuation date to the measurement date,
- Calculation of the Net Pension Liability at the discount rate as well as discount rates 1% higher and lower than the discount rate, and
- Changes in the Net Pension Liability.

Highlights

The reporting date for the Police and Firemen's Retirement System of New Jersey (PFRS) is June 30, 2018. Measurements as of the reporting date are based on the fair value of assets as of June 30, 2018 and the Total Pension Liability as of the valuation date, July 1, 2017, updated to June 30, 2018. There was a change in assumptions as the discount rate used to measure the Total Pension Liability was changed as of the measurement date. We are not of any other significant events between the valuation date and the measurement date so the update procedures only included the addition of service cost and interest cost offset by actual benefit payments and an adjustment to reflect the change in discount rate.

The June 30, 2017 values shown in this report are based on the prior actuary's GASB report.

The following table provides a summary of the key results during this reporting period broken out by State, Local Employers and in Total for the System.

Table I-1 Summary of Results									
Measurement Date	June 30, 2017								
State									
Total Pension Liability	\$ 5,837,506,505	\$ 5,939,531,281							
Plan Fiduciary Net Position	1,508,202,229	1,543,788,140							
Net Pension Liability	\$ 4,329,304,276	\$ 4,395,743,141							
<u>Local Employers</u>									
Total Pension Liability	\$ 40,960,053,149	\$ 41,471,190,457							
Plan Fiduciary Net Position	25,590,353,871	24,303,930,259							
Net Pension Liability	\$ 15,369,699,278	\$ 17,167,260,198							
Total									
Total Pension Liability	\$ 46,797,559,654	\$ 47,410,721,738							
Plan Fiduciary Net Position	27,098,556,100	25,847,718,399							
Net Pension Liability	\$ 19,699,003,554	\$ 21,563,003,339							

SECTION II - CERTIFICATION

The purpose of this report is to provide accounting and financial reporting information under GASB 67 for the Police and Firemen's Retirement System of New Jersey (PFRS). This report is for the use of PFRS, the Division of Pensions and Benefits and their auditors in preparing financial reports in accordance with applicable law and accounting requirements. This report is not appropriate for other purposes, including the measurement of funding requirements for PFRS and estimating the price to settle PFRS's obligations.

In preparing our report, we relied on information (some oral and some written) supplied by the Division of Pensions and Benefits. This information includes, but is not limited to, the plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.

Future actuarial measurements may differ significantly from the current measurements due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law.

For purposes of this report, the calculation of the Total Pension Liability and the projection of the Plan's contributions and projected benefit payments were based on the recommended demographic assumptions of the July 1, 2010 – June 30, 2013 Experience Study prepared by the prior actuary, which was approved by the Board of Trustees on February 9, 2015. Cheiron has reviewed this experience study. While we consider these assumptions to be generally reasonable, we have not yet performed our own actuarial experience study.

Based on the State Treasurer's recommendation the following economic assumptions are used to determine the Total Pension Liability and the actuarially determined contributions:

- Effective with the July 1, 2017 valuation: 7.50% per annum,
- Effective with the July 1, 2019 valuation: 7.30% per annum,
- Effective with the July 1, 2021 valuation: 7.00% per annum,

In accordance with Paragraph 40 of GASB Statement No. 67, the projection of the Plan's fiduciary net position is based on a long-term expected rate of return of 7.00% per annum.

To the best of our knowledge, this report and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices that are consistent with the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys and our firm does not provide any legal services or advice.

SECTION II - CERTIFICATION

This report was prepared for PFRS for the purposes described herein and for the use by the plan auditor in completing an audit related to the matters herein. Other users of this report are not intended users as defined in the Actuarial Standards of Practice, and Cheiron assumes no duty or liability to any other user.

Patel

SECTION III – DETERMINATION OF DISCOUNT RATE

The discount rate used to measure the Total Pension Liability was 6.14% as of June 30, 2017 and 6.51% as of June 30, 2018. As discussed with the Division of Pensions and Benefits, the projection of cash flows used to determine the discount rate as of June 30, 2018 assumed:

- In accordance with Paragraph 40 of GASB Statement No. 67, the projection of the Plan's fiduciary net position is based on a long-term expected rate of return of 7.00% per annum.
- In accordance with Paragraph 37 of GASB Statement No. 67, the projection of the Plan's contributions and projected benefit payments were based on the recommended demographic assumptions of the July 1, 2010 June 30, 2013 Experience Study prepared by the prior actuary, which was approved by the Board of Trustees on February 9, 2015.

Based on the State Treasurer' recommendation the following economic assumptions are used to determine the actuarially determined contributions:

- o Effective with the July 1, 2017 valuation: 7.50% per annum,
- o Effective with the July 1, 2019 valuation: 7.30% per annum,
- o Effective with the July 1, 2021 valuation: 7.00% per annum.
- It is assumed that the Local employers will contribute 100% of their actuarially determined contribution and 100% of their Non-Contributory Group Insurance Premium Fund (NCGIPF) contribution while the State will contribute 50% of their actuarially determined contribution and 100% of their NCGIPF contribution. The 50% contribution rate is the actual total State contribution rate paid in fiscal year ending June 30, 2018 with respect to the actuarially determined contribution for the fiscal year ending June 30, 2018 for all State administered retirement systems.
- Prior to FYE 2018, it was assumed the State would make pension contributions the June 30th following the valuation date. Effective with FYE 2018, Chapter 83, P.L. 2016 requires the State to make pension contributions on a quarterly basis: at least 25 percent by September 30, at least 50 percent by December 31, at least 75 percent by March 31, and at least 100 percent by June 30.
- In accordance with Chapter 98, P. L. 2017, PFRS receives 1.2% of the proceeds of the Lottery Enterprise for a period of 30 years. Revenues received from lottery proceeds are assumed to be contributed to the System on a monthly basis.
- It is assumed that Local employers' contributions are expected to be received on April 1st, 21 months after the associated valuation date.

SECTION III – DETERMINATION OF DISCOUNT RATE

The Fiduciary Net Position (FNP) includes Local employers' contributions receivable as reported in the financial statements provided to us by the Division of Pensions and Benefits. In determining the discount rate in Appendix D, the FNP at the beginning of each year does not reflect receivable contributions as those amounts are not available at the beginning of the year to pay benefits. The receivable contributions for the current year and prior year are shown below:

- For FYE June 30, 2017, the FNP includes receivable contributions of \$1,012,746,669 (\$849,312,733 for appropriations, \$35,809,000 for NCGIPF, \$116,220,660 for Chapter 19 and \$11,404,276 for ERI).
- For FYE June 30, 2018, the FNP includes receivable contributions of \$1,089,730,202 (\$940,592,142 for appropriations, \$37,157,368 for NCGIPF, \$102,125,815 for Chapter 19 and \$9,867,107 for ERI, offset by \$12,230 for NCGIPF adjustment).

Based on these assumptions, the pension Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current Plan members through fiscal year 2062. Municipal bond rates of 3.58% as of June 30, 2017 and 3.87% as of June 30, 2018 were used in the development of the blended GASB discount rate after the Plan's fiduciary net position was no longer sufficient to make future benefit payments. As selected by the State Treasurer, the rates are based on the Bond Buyer GO 20-Bond Municipal Bond Index. Based on the long-term rate of return of 7.00% and the municipal bond rate of 3.58% as of June 30, 2017 and the long-term rate of return of 7.00% and the municipal bond rate of 3.87% as of June 30, 2018, the blended GASB discount rates are 6.14% as of June 30, 2017 and 6.51% as of June 30, 2018. The assumed discount rates have been determined in accordance with the method prescribed by GASB Statement No. 67.

SECTION IV - PROJECTION OF TOTAL PENSION LIABILITY

The Total Pension Liability (TPL) at the end of the measurement year, June 30, 2018, is measured as of a valuation date of July 1, 2017 and projected to June 30, 2018. The TPL and service cost were calculated using the Entry Age Normal Cost Method as prescribed by GASB 67. All TPL amounts shown in Tables IV-1A to IV-1C below include liabilities attributable to the NCGIPF. In addition, net employer transfer contributions and net member transfer contributions with accumulated interest have been added to the June 30, 2018 TPL.

There were no significant events during the projection period of which we are aware. Because the TPL shown in the prior report was measured as of July 1, 2016 and projected to June 30, 2017, it will not match the amounts measured as of July 1, 2017 that are shown in this exhibit.

The following tables show the projection of the TPL, broken out by State, Local employers and in Total for the System, and at discount rates equal to the rate used for disclosure and plus and minus one percent from the rate used for disclosure.

Table IV-1A Projection of Total Pension Liability from Valuation to Measurement Date State

SECTION V – NOTE DISCLOSURES

The following tables show the changes in the Total Pension Liability, the Plan Fiduciary Net Position (i.e., fair value of System assets), and the Net Pension Liability during the Measurement Year. There was a change in assumptions as the discount rate was increased from 6.14% as of June 30, 2017 to 6.51% as of June 30, 2018.

Per discussions with the Division of Pensions and Benefits, the Palisades Interstate Park Commission (Employer Number 91999) was transferred from Local Employers to State.

Consistent with prior practice, contributions in the amount of \$102,177 for two employers, Lower Camden County Regional High School District (Employer Number 76200) and the New Jersey Institute of Technology (Employer Number 62400), were shifted from Local Employers to State. The Plan Fiduciary Net Position was also adjusted to account for this shift.

SECTION V – NOTE DISCLOSURES

Changes in the discount rate affect the measurement of the TPL. Lower discount rates produce a higher TPL and higher discount rates produce a lower TPL. Because the discount rate does not affect the measurement of assets, the percentage change in the NPL can be very significant for a relatively small change in the discount rate. The following table shows the sensitivity of the NPL to the discount rate.

Sensitivity of Net Pension	Table V-2 Liability to Chang	ges i	in Discount Rate		
	1% Decrease 5.51%		Discount Rate 6.51%		1% Increase 7.51%

Contributions as a Percentage of Covered Payroll		30.81%		28.08%

SECTION VI – REQUIRED SUPPLEMENTARY INFORMATION

The following summarizes key methods and assumptions used to determine the Actuarially Determined Contribution for FYE 2018.

Valuation Date: July 1, 2016

Timing: Actuarial determined contributions are calculated as of the July 1 preceding the fiscal year in which

contributions are made.

Actuarial cost method: Projected Unit Credit

Amortization method: Level dollar

Remaining amortization period: Open 30-year period

Asset valuation method: 5-year smoothing of difference between market value and expected actuarial value

Investment rate of return: 7.65%

Salary increases: Age-based rates scaling from 8.98% for age 25 to 2.10% at age 64 through fiscal year ending 2025;

Age-based rates scaling from 9.98% for age 25 to 3.10% at age 64 for fiscal years ending 2026 and thereafter

Mortality: Pre-Retirement, Healthy Female Retirees and Beneficiaries: RP-2000 Combined Healthy Mortality Tables

projected on a generational basis using Projection Scale BB from the base year of 2000 to 2013 and the

Conduent Modified 2014 Projection Scale thereafter

Healthy Male Retirees: RP-2000 Combined Healthy Mortality Table projected on a generational basis using Projection Scale AA from the base year of 2012 to 2013 and the Conduent Modified 2014 Projection Scale

thereafter

Disabled Retirees: Custom mortality table. Sample rates below:

Age	Rates
35	0.598%
40	0.634
45	0.803
50	1.058
55	1.210
60	1.426
65	1.949

APPENDIX A – MEMBERSHIP INFORMATION

	Plan Memb	ers	hip			
		July 1, 2016				
	State		Employers		Total	Total
Contributing Actives	6,746		33,394		40,140	39,389
Non-Contributing Actives	342		1,035		1,377	1,400
Terminated Vested	7		32		39	47
Inactive Receiving Benefits	 6,568		37,187	_	43,755	 43,011
Total	13,663		71,648		85,311	83,847
Annual Compensation for Contributing Actives Annual Retirement Allowances for Those	\$ 482,888,837	\$	3,320,459,492	\$	3,803,348,329	\$ 3,726,807,562
Receiving Benefits	\$ 306,789,433	\$	2,095,977,170	\$	2,402,766,603	\$ 2,315,888,032

^{*} QDRO recipients are excluded from the counts

The July 1, 2017 membership information shown in the table above is based on Cheiron's processed data and may not match the prior actuary's report.

APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS

A. Actuarial Assumptions

- 1. Investment Rate of **Return for** determining Actuarially **Determined Contributions**
- July 1, 2017 valuation: 7.50% per annum, compounded annually.
- July 1, 2018 valuation: 7.50% per annum, compounded annually.
- July 1, 2019 valuation: 7.30% per annum, compounded annually.
- July 1, 2020 valuation: 7.30% per annum, compounded annually.
- July 1, 2021 and later valuations: 7.00% per annum, compounded annually.
- Rate of Return

2. Long-Term Expected 7.00% per annum, compounded annually.

- 3. GASB 67 Effective **Discount Rate**
- June 30, 2017: 6.14% per annum, compounded annually.
- June 30, 2018: 6.51% per annum, compounded annually.
- 4. Administrative **Expenses**
- 0.18% of the expected benefit payments for the year.
- 5. Cost-of-Living **Adjustments** (COLAs)

No future COLAs are assumed. Previously granted COLAs are included in the data.

6. Salary Increases

Representative salary increase rates are as follows:

	Prior to FYE	FYE 2026 and
Age	2026	thereafter
25	8.98%	9.98%
30	5.97	6.97
35	4.17	5.17
40	3.33	4.33
45	2.90	3.90
50	2.75	3.75
55	2.60	3.60
60	2.35	3.35
64	2.10	3.10

- 7. 401(a)(17) Pay Limit \$270,000 in 2017 increasing 3.00% per annum, compounded annually.
- 8. Social Security Wage \$127,200 in 2017 increasing 4.00% per annum, compounded Base annually.

APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS

9. Termination Representative termination rates are as follows:

	Years of Service									
Age	0 - 1	2	3	4	5 - 9	10+				
25	6.90%	2.03%	1.18%	0.60%	0.35%	0.00%				
30	9.30	2.75	1.76	1.31	0.60	0.24				
35	9.80	3.17	1.76	1.57	0.77	0.24				
40	13.70	2.25	1.85	1.74	0.67	0.27				
45	3.50	2.25	1.85	2.32	1.35	0.28				
50	0.00	2.25	1.85	2.00	1.60	0.30				
55	0.00	0.00	0.00	0.00	0.00	0.00				

No termination is assumed after attainment of retirement eligibility.

All members with 10 or more years of service at termination are assumed to elect a deferred retirement benefit.

10. Disability Representative disability rates are as follows:

Age	Ordinary Disability	Accidental Disability
25	0.045%	0.029%
30	0.147	0.278
35	0.265	0.393
40	0.362	0.423
45	0.394	0.396
50	0.449	0.179
55	0.554	0.161
60	1.024	0.161
64	1.680	0.161
65+	0.000	0.000

Both ordinary and accidental disability rates apply at all ages until the mandatory retirement age of 65.

Members retiring under the ordinary disability decrement with less than four years of service are assumed to receive a return of Aggregate Contributions.

No members are assumed to receive the involuntary disability retirement benefit.

Members are assumed to receive the greater of the applicable disability benefit or the service or special retirement benefit, depending on eligibility.

19

APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS

11. Mortality

<u>Pre-Retirement Ordinary Mortality</u>: RP-2000 Combined Healthy Mortality Tables projected on a generational basis from the base year of 2000 to 2013 using Projection Scale BB and the Conduent Modified 2014 Projection Scale thereafter.

<u>Pre-Retirement Accidental Mortality</u>: Custom table with representative rates as follows.

Age	Rates
25	0.006%
30	0.006
35	0.008
40	0.008
45	0.009
50	0.009
55	0.014
60	0.013
64	0.008
65+	0.000

No mortality improvement is assumed for pre-retirement accidental mortality.

<u>Post-Retirement Healthy Female Retiree and Beneficiary Mortality</u>: RP-2000 Combined Healthy Mortality Tables projected on a generational basis from the base year of 2000 to 2013 using Projection Scale BB and the Conduent Modified 2014 Projection Scale thereafter.

<u>Post-Retirement Healthy Male Retiree Mortality</u>: RP-2000 Combined Healthy Mortality Tables projected on a generational basis using Projection Scale AA from the base year of 2012 to 2013 and the Conduent Modified 2014 Projection Scale thereafter.

<u>Disabled Retiree Mortality</u>: Custom table with representative rates as follows.

Age	Rates
35	0.598%
40	0.634
45	0.803
50	1.058
55	1.210
60	1.426
65	1.949

No mortality improvement is assumed for disabled retiree mortality.

APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS

12. Retirement

Representative retirement rates are as follows:

Years of Service								
Age	Less Than 21	21 - 24	25	26+				
40	4.00%	0.60%	45.57%	15.40%				
45	4.00	0.60	54.83	15.40				
50	4.30	0.60	57.62	18.48				
55	6.00	0.00	64.94	24.47				
60	3.20	0.00	77.49	27.34				
64	37.50	0.00	85.24	51.03				

Mandatory retirement at age 65.

Retirement rates for less than 25 years of service prior to age 55 apply only to members enrolled as of January 18, 2000 upon completion of 20 years of service.

13. Family Composition Assumptions

For members not currently in receipt, 90% of members are assumed married to spouses of the opposite sex. Males are assumed to be three years older than females.

For purposes of the post-retirement death benefit for members currently in receipt, beneficiary status is based on the beneficiary allowance reported. If no beneficiary date of birth is provided, the beneficiary is assumed to be the member's spouse of the opposite sex with males assumed to be three years older than females.

No additional dependent children or parents are assumed.

For current dependents receiving a pre-retirement accidental death benefit, those under age 24 are assumed to receive a benefit until age 24 while those over age 24 are assumed to receive a benefit for the remainder of their lifetime.

For current dependents receiving a benefit other than a pre-retirement accidental death benefit, those under age 19 are assumed to receive a benefit until age 19 while those over age 19 are assumed to receive a benefit for the remainder of their lifetime.

APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS

14. Data

Information provided by the prior actuary was relied upon for the purposes of setting the status of and valuing non-contributing active records.

For current beneficiaries with missing data, reasonable assumptions were made based on the information available in prior years.

Inactive participants receiving benefits according to the 2016 data but omitted from the 2017 data are assumed to have died without a beneficiary.

APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS

B. Actuarial Methods

The actuarial methods used for determining State and Local employer contributions are described below.

1. Actuarial Cost Method

The actuarial cost method for funding calculations is the Projected Unit Credit Cost Method.

The actuarial liability is calculated as the actuarial present value of the projected benefits linearly allocated to periods prior to the valuation year based on service. The unfunded actuarial liability is the actuarial liability on the valuation date less the actuarial value of assets.

In accordance with Chapter 78, P.L. 2011:

- Beginning with the July 1, 2010 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level dollars, it will amortize the unfunded accrued liability over an open 30 year period.
- Beginning with the July 1, 2018 actuarial valuation, the accrued liability contribution shall be computed so that if the contribution is paid annually in level dollars, it will amortize the unfunded accrued liability over a closed 30 year period (i.e., for each subsequent actuarial valuation the amortization period shall decrease by one year).
- Beginning with the July 1, 2028 actuarial valuation, when the remaining amortization period reaches 20 years, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 20 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 20 years, the accrued liability contribution shall be computed for the valuation year using a 20 year amortization period.

Certain portions of the normal cost and unfunded actuarial liabilities attributable to Local employers are payable by the State and/or over different periods in accordance with the NJ State Statutes.

To the extent that the amortization period remains an open period in future years and depending upon the specific circumstances, it should be noted that in the absence of emerging actuarial gains or contributions made in excess of the actuarially determined contribution, any existing unfunded accrued liability may not be fully amortized in the future.

The non-contributory group life insurance benefit is funded separately through a term cost.

APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS

2. Asset Valuation Method

For the purposes of determining contribution rates, an actuarial value of assets is used that dampens the volatility in the market value of assets, resulting in a smoother pattern of contributions.

The actuarial value of assets is adjusted to reflect actual contributions and benefit payments, an assumed return on the previous year's assets and current year's cash flow at the prior year's actuarial valuation interest rate, with a further adjustment to reflect 20% of the difference between the resulting value and the actual market value of Plan assets.

3. Contributions

Prior to FYE 2018, it was assumed the State would make pension contributions on June 30th, 24 months after the associated valuation date. Effective with FYE 2018, Chapter 83, P.L. 2016 requires the State to make pension contributions on a quarterly basis: at least 25 percent by September 30, at least 50 percent by December 31, at least 75 percent by March 31, and at least 100 percent by June 30. As such, contributions are assumed to be made on a quarterly basis, with the first contribution 15 months after the associated valuation date.

Local employers' contributions are expected to be paid on April 1st, 21 months after the associated valuation date.

Revenues from the Chapter 98, P.L. 2017 – Lottery Enterprise Contribution Act are assumed to be contributed to the trust on a monthly basis.

Contributions payable in the fiscal year starting on the valuation date are included in the actuarial value of assets as receivable contributions, discounted by the applicable valuation interest rate.

APPENDIX C – SUMMARY OF PLAN PROVISIONS

This summary of Plan provisions provides an overview of the major provisions of the PFRS used in the actuarial valuation. It is not intended to replace the more precise language of the NJ State Statutes, Title 43, Chapter 16A, and if there is any difference between the description of the plan herein and the actual language in the NJ State Statutes, the NJ State Statutes will govern.

1. Eligibility of Membership

Eligibility is restricted to eligible police officers and firefighters in an eligible job title of classification who also meet the age, medical and training criteria for membership. The maximum enrollment age is 35.

2. Plan Year

The 12-month period beginning on July 1 and ending on June 30.

3. Creditable Service

A year of service is credited for each year an employee is a Member of the Retirement System plus service, if any, covered by a prior service liability.

4. Compensation

Base salary upon which contributions by a Member to the Annuity Savings Fund were based in the last year of service. Chapter 113, P.L. 1997 provides that Compensation cannot exceed the compensation limitation of Section 401(a)(17) of the Internal Revenue Code. Chapter 1, P.L. 2010 provides that for members hired on or after May 22, 2010, Compensation cannot exceed the annual maximum wage contribution base for Social Security, pursuant to the Federal Insurance Contribution Act.

5. Final Compensation

Annual compensation received by the Member in the last 12 months of Creditable Service preceding his retirement. Chapter 1, P.L. 2010 provides that for members hired on or after May 22, 2010, Final Compensation means the average annual compensation for the three fiscal years of membership providing the largest benefit.

6. Aggregate Contributions

The sum of all amounts deducted from the compensation of a Member or contributed by him or on his behalf without interest.

7. Member Contributions

Each Member contributes 10% of base salary.

APPENDIX C – SUMMARY OF PLAN PROVISIONS

8. Benefits

a) Service and Special Retirement

Mandatory retirement at age 65, except a Member hired prior to January 1, 1987 may remain a Member until attaining the earlier of age 68 or 25 years of Creditable Service. Voluntary retirement prior to age 65.

(1) <u>Service Retirement</u>: For a Member enrolled as of January 18, 2000, age 55 or 20 years of Creditable Service. For a Member enrolled after January 18, 2000, age 55.

Benefit is an annual retirement allowance comprised of a member annuity plus an employer pension which together equal the greater of:

- a. 2% of Final Compensation for each year of Creditable Service up to 30 years plus 1% of Final Compensation for each year of Creditable Service over 30 years.
- b. 50% of Final Compensation for Members with 20 or more years of Creditable Service.
- c. 50% of Final Compensation plus 3% of Final Compensation for each year of Creditable Service in excess of 20 years for Members as of January 18, 2000 who would have 20 years of Creditable Service but not 25 years at age 65.
- (2) Special Retirement: 25 years of Creditable Service.

Benefit is in an annual retirement allowance comprised of a member annuity plus an employer pension which together equal:

- a. For Members enrolled on or before June 28, 2011, 65% of Final Compensation plus 1% of Final Compensation for each year of Creditable Service in excess of 25 years with a maximum of 70% of Final Compensation, except for those members with 30 or more years of Creditable Service on June 30, 1979.
- b. For Members hired after June 28, 2011, 60% of Final Compensation plus 1% of Final Compensation for each year of Creditable Service in excess of 25 years with a maximum of 65% of Final Compensation.

APPENDIX C – SUMMARY OF PLAN PROVISIONS

b) Deferred Retirement

Termination of service prior to age 55 with 10 years of Creditable Service.

Benefit is either a refund of Aggregate Contributions, or a deferred life annuity commencing at age 55 comprised of a member annuity plus an employer pension which together equal 2% of Final Compensation for each year of Creditable Service up to 30 plus 1% of Final Compensation for each year of Creditable Service over 30 years.

For Members who die during the deferral period, the benefit is a return of Aggregate Contributions.

c) Non-Vested Termination

Termination of service prior to age 55 and less than 10 years of service credit.

Benefit is a return of Aggregate Contributions.

d) Death Benefits

- (1) Ordinary Death Before Retirement: Death of an active Member. Benefit is equal to:
 - a. Lump sum payment equal to 350% of Compensation, also known as the non-contributory group life insurance benefit, plus
 - b. Spousal life annuity of 50% of Final Compensation payable until spouse's death or remarriage. If there is no surviving spouse or upon death or remarriage, a total of 20% (35%, 50%) of Final Compensation payable to one (two, three or more) dependent child(ren). If there is no surviving spouse or dependent child(ren), 25% (40%) of Final Compensation to one (two) dependent parent(s). If there is no surviving spouse, dependent child(ren) or parent(s), the benefit is a refund of Aggregate Contributions.
- (2) <u>Accidental Death Before Retirement</u>: Death of an active Member resulting during performance of duties. Benefit is equal to:
 - a. Lump sum payment equal to 350% of Compensation, also known as the non-contributory group life insurance benefit, plus
 - b. Spousal life annuity of 70% of Compensation payable until spouse's death or remarriage. If there is no surviving spouse or upon death or remarriage, 70% of Compensation payable to dependent children in equal shares. If there is no surviving spouse or dependent child(ren), 25% (40%) of Compensation to one (two) dependent parent(s). If there is no surviving spouse, dependent child(ren) or parent(s), the benefit is a refund of Aggregate Contributions.

APPENDIX C – SUMMARY OF PLAN PROVISIONS

- (3) Death After Retirement: Death of a retired Member. Benefit is equal to:
 - a. Lump sum payment equal to 50% of Compensation for a Member retired under service, special or deferred retirement. For a Member receiving a disability benefit, lump sum payment of 350% of Compensation if death occurs prior to age 55 and 50% of final compensation if death occurs after age 55. This benefit is also known as the non-contributory group life insurance benefit, plus
 - b. For Members who retired on or after January 1, 1968, spouse life annuity of 50% of Final Compensation plus 15% (25%) of Final Compensation for one (two or more) dependent child(ren). The minimum benefit is \$4,500 per year. If there is no surviving spouse or upon death or remarriage, a total of 20% (35%, 50%) of Final Compensation payable to one (two, three or more) dependent child(ren). Previously granted COLAs also apply.

e) Disability Retirement

(1) <u>Ordinary Disability Retirement</u>: Four years of Creditable Service and totally and permanently incapacitated from the performance of usual or available duties.

Benefit is an annual retirement allowance comprised of a member annuity plus an employer pension which together equal the greater of:

- a) 40% of Final Compensation, or
- b) 1.5% of Final Compensation for each year of Creditable Service.
- (2) <u>Involuntary Ordinary Disability Retirement</u>: Ordinary Disability Retirement applied for by the employer.

Benefit is an annual retirement allowance comprised of a member annuity plus an employer pension which together equal:

- a) For Members with 20 years of Creditable Service but less than 25 years, 50% of Final Compensation plus 3% of Final Compensation for each year of Creditable Service in excess of 20 years, to a maximum of 65% of Final Compensation.
- b) For all other members, the Ordinary Disability benefit.
- (3) <u>Accidental Disability Retirement</u>: Totally and permanently disabled as a direct result of a traumatic event occurring during and as a result of regular or assigned duties and such member is mentally or physically incapacitated for the performance of his usual duties.

Benefit is an annual retirement allowance comprised of a member annuity plus an employer pension which together equal 2/3 of annual rate of compensation at the time of the traumatic event or retirement, whichever is greater.

APPENDIX C – SUMMARY OF PLAN PROVISIONS

(4) <u>Special Disability Retirement</u>: Under age 55 with 5 years of Creditable Service and received a heart transplant.

Benefit is an annual retirement allowance comprised of a member annuity plus an employer pension which together equal 50% of Final Compensation.

9. Forms of Payment

No optional forms of payment are available.

10. Cost-of-Living Adjustments

Also known as Pension Adjustments. Provided annually to retirees and survivors after 24 months of retirement prior to July 1, 2011. Chapter 78, P.L. 2011 eliminated future adjustments effective July 1, 2011. Adjustments may be reinstated in the future subject to certain conditions outlined in Chapter 78, P.L. 2011.

11. Changes in Plan Provisions Since Last Valuation

None.

APPENDIX D – DETERMINATION OF DISCOUNT RATE

APPENDIX E – GLOSSARY OF TERMS

1. Actuarially Determined Contribution

A target or recommended contribution for the reporting period, determined in conformity with Actuarial Standards of Practice based on the most recent measurement available when the contribution for the reporting period was adopted.

2. Actuarial Valuation Date

The date as of which an actuarial valuation is performed. This date may be up to 24 months prior to the measurement date and up to 30 months prior to the employer's reporting date.

3. Entry Age Actuarial Cost Method

The actuarial cost method required for GASB 67 calculations. Under this method, the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings of the individual between entry age and assumed exit ages. The portion of this actuarial present value allocated to a valuation year is called the Service Cost. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future service costs is called the Total Pension Liability.

4. Measurement Date

The date as of which the Total Pension Liability and Plan Fiduciary Net Position are measured. The Total Pension Liability may be projected from the Actuarial Valuation Date to the Measurement Date. The Measurement Date must be the same as the Reporting Date for the plan.

5. Net Pension Liability

The liability of employers and nonemployer contributing entities for employees for benefits provided through a defined benefit pension plan. It is calculated as the Total Pension Liability less the Plan Fiduciary Net Position.

6. Plan Fiduciary Net Position

The fair or market value of assets.

7. Reporting Date

The last day of the plan or employer's fiscal year.

APPENDIX E – GLOSSARY OF TERMS

8. Service Cost

The portion of the actuarial present value of projected benefit payments that is attributed to the current period of employee service in conformity with the requirements of GASB 67. The Service Cost is the normal cost calculated under the entry age actuarial cost method.

9. Total Pension Liability

The portion of the actuarial present value of projected benefit payments that is attributed to past periods of employee service in conformity with the requirements of GASB 67. The Total Pension Liability is the actuarial liability calculated under the entry age actuarial cost method. This measurement generally is not appropriate for estimating the cost to settle the Plan's liabilities.
